CAPACITY:
317 gallons
(1200 liters)

DMZ
SYSTEMS DE MEXICO

Aquatank is a polyethylene tank with Advanced Three-Layer technology, thus becoming the perfect solution for the efficient and safe storage of the vital liquid in your home or business.

Designed with cutting-edge engineering and high-quality materials, **Aquatank** represents a significant advance in water storage technology.

DESIGN AND MATERIAL:

THREE-LAYER POLYETHYLENE

FOAMED MIDDLE LAYER

(for thermal insulation)

UV PROTECTION

(inside layer to avoid bacterial growth)

VERSATILE INSTALLATION

Its compact and ergonomic design facilitates installation in spaces, whether on the roof or in areas with limited access.

Includes all accessories for efficient operation:

- High tank valve · Multi-connector with key
- Flange · Top · Float · Air jug

PROVEN DURABILITY

Aquatank is resistant to impacts, extreme weather changes and UV rays, ensuring long life and reliable performance.

ENERGY EFFICIENCY

The foamed middle layer acts as a thermal barrier, reducing heat absorption and maintaining water temperature efficiently. Likewise, it contributes to lower energy consumption when heating water.

MINIMUM MAINTENANCE

Its smooth surface, resistant to the adhesion of dirt and the development of microorganisms, makes cleaning and maintenance simple and fast.
